

GRAIN SPEAR

from AEAM

AEAM GRAIN SPEARS AND FANS

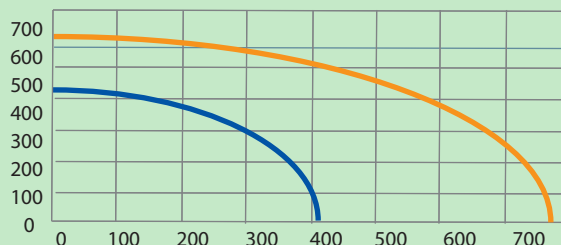

- Use AEAM grain spears and fans to remove excess heat and moisture from grain stores
- Reduced heat and moisture improves quality, shelf life and reduces likelihood of insect infestation.
- Use for wheat, oats, barley, oil seed rape and other seed crops
- Proven cost-effective measure for getting the most from your crops

- Cools & helps dry 35-40 tonnes of grain.
- High performance - more than 50% increase over competitors' equivalent priced units.
- Easy clean scroll • Non rusting cast aluminium design for robustness • Long life high quality motor • Precision balanced impeller.
- Speed controllable motor of high quality means less likely to burn out under miss-use.
- Suitable for wheat, barley, oats, OSR – even corn and seed crops. • Portable - easy to use - adaptable a - very robust - should give many seasons' reliable use. • Vermin proof spear assembly made of high quality galvanised steel for long life. • Each spear comes with a screw handle to help drive the spear into the grain pile. • Each system is supplied with a 12 Month warranty against mechanical or workmanship defects.
